

ULTRASOUNDGUIDED SHOULDER INTERVENTIONS

This course is aimed at doctors, physiotherapists, naprapaths, chiropractors and sonographers who wants to get started with ultrasoundguided shoulder injections. You need basic skills in shoulder ultrasound to take the course. Under careful guidance, you will learn all aspects of injections around the shoulder and have plenty of time to learn in a safe, supervised environment. The objective is that you after this course should have sufficient knowledge to start with ultrasound guided injections at your clinic. After completing the course, you will receive a participation certificate but are responsible for following the rules and recommendations regarding, for example, delegation that your National Board of Health and Welfare specifies for your profession.

Date: Wednesday 3 December, Time: 9.00-17.00

Maximum of 6 participants!

Place: Medema Physio AB, Borgarfjordsgatan 18, Kista, Stockholm, Sweden

Price: 290 €, VAT excluded. (3300 SEK, exkl. moms) Food, beverage and course material included.

Registration by email to: magnus.wennerlund@regionvastmanland.se

TEACHER
